

NOTICE of STUDY COMMENCEMENT

Kennedy Road Improvements from Mayfield Road north 800 metres

The Town of Caledon is initiating a Class Environmental Assessment to investigate various improvements to Kennedy Road, from Mayfield Road to the southern limits of the Mayfield West Community Development Area - a distance of approximately 800 metres (see map below). Transportation corridor improvements are necessary to meet traffic demands on Kennedy Road as a result of planned development in the area, especially for the Mayfield West Community Area and the extension of Highway 410. Philips Engineering Ltd. has been retained by the Town of Caledon to complete the study.

This study will consider, evaluate and detail alternative solutions to address deficiencies with this section of Kennedy Road. The study will be conducted in compliance with Schedule "C" of the Municipal Engineers Association "Municipal Class Environmental Assessment" (June 2000).

A key component of the study will be consultation with interested stakeholders (public, landowners and regulatory agencies). Two Public Information Centres will be held to provide interested parties with an opportunity to review and discuss issues related to the project, including existing conditions, an assessment of alternatives, selection of the preferred alternative, and environmental considerations. Details regarding the forthcoming Public Information Centres will be advertised as the study progresses.

For more information on this project and the Class Environmental Assessment process, please visit: www.caledon.ca/townhall/departments/planningdevelopment/Transportation%20Intro.asp

We are interested in hearing any comments or concerns that you may have about this study. Comments and information regarding the study are being collected to assist the Town of Caledon in meeting the requirements of the Environmental Assessment Act. This material will be maintained on file for use during the project and may be included in project documentation. With the exception of personal information, all comments will become part of the public record.

If you require further information, or if you have specific comments related to this project, please contact either:
